NETWORK provides a proven foundation for success:

- **Deep Category Knowledge**—Clean facilities include more than shiny floors and sparkling windows. Rely on NETWORK’s commercial real estate team to understand the products and deliver the training your organization needs to heighten property-appeal. As a proud member of the U.S. Green Building Council (USGBC), NETWORK is attuned to the issues and insights in the commercial real estate market today. From improving the health and wellness of buildings, to maximizing the efficiency and effectiveness of your maintenance procedures; our trained and knowledgeable team provides the expert support building service contractors need.

- **Vast Infrastructure, Local Responsiveness**—Our system blends single-source convenience and centralized control with true local market presence; the result is seamless account service, compliance, and lower total overall costs.

- **Game Changing Innovation**—NETWORK never stops improving. We bring new products to market quickly and create proprietary programs, like NetGreen™, to support the objectives of our building service contractor customers.

- **Informed Business Decisions**—Better supply chain transparency fosters more informed business decisions. NETWORK provides accurate, timely data, 24/7 access to an e-procurement technology, spend and compliance management tools and quarterly business reviews, so you can spend less time reconciling transactions and more time optimizing your operations.

Only NETWORK combines the efficiency of a centrally managed national structure with local market presence, personal accountability, program flexibility, and market expertise. Our resources are dedicated to meeting the supply needs of today’s building service contractors. See what Distribution by Design™ can do for you. Contact NETWORK for more information.

YOUR NETWORK SOLUTION FOR A SUSTAINABLE ENVIRONMENT AND WORKPLACE

Balancing the demand for sustainable business practices with the need for cost containment can be a challenge. To proactively address this critical business issue, NETWORK created NetGreen™. This proprietary program provides a holistic, collaborative approach to achieving your sustainability goals:

- ASSESS – we review your current situation, your goals, and your timeline
- ADVISE – we share products and processes that support your unique sustainability goals
- CONNECT – we provide a bridge to the leading suppliers of quality Green services and products
- COORDINATE – we facilitate access to local market experts who provide training and recommendations on the applications and advantages of Green solutions

With this collaborative approach, we can help you meet your social, environmental and economic sustainability needs.
